- activation lever on both sides of the table

### Table base

- protected by durable ABS plastic cover
- attachment is screwless for easier cleaning

CONFIGURE

### Foot switch

- easy to use

### Weight capacity

- perfect stability due to standard 200 kg safe working load

## For perfect comfort

Massage and therapy tables S – basic ensure **maximum comfort** to your clients and patients during massage or physiotherapy treatments. The **8 cm thick soft or firm foam PADDING** provides a wide and comfortable lying surface. The tables feature a **BREATHING HOLE** in the head section including a **MATCHING PLUG** as part of the standard equipment. Your patient's **face** will be **gently supported** during treatment in prone position. To ensure that the patient's neck, shoulders and back are **completely relaxed**, you can choose a **THREE-PART HEAD SECTION**. The armrests are adjusted separately with a simple screw mechanism.

**ELECTRIC HEIGHT ADJUSTMENT** helps you **protect your health** as the table can be positioned to the exact appropriate height for each individual treatment. Due to a simple **FOOT SWITCH**, you will easily adjust the height while working even if your hands are covered in oil or lotion. The **table sections** are supported by gas springs allowing you to adjust your **patients' position effortlessly and quickly**.

## Fully adjustable for various treatments

All four basic massage and therapy table models are a **perfect** economical **combination of ELEGANCE and FUNCTIONALITY** for massage studios, spas, resorts and physiotherapy practices. Two massage table models offer a **wide and comfortable lying surface** to perform massages and therapies. If treatments demand positions with negative section incline to allow the **Jackknife or Trendelenburg position**, choose the therapy table model. All its sections are manually adjustable.

Together with a **200 kg SAFE WORKING LOAD**, the **lean but sturdy construction** ensures perfect **stability** even when you apply strong pressure during treatment. The tables also feature **RETRACTABLE CASTORS** so you can easily move them around a room, otherwise they firmly stand on their four **RUBBER FEET**.

## Easy cleaning

To ensure **simple cleaning** and **high hygiene standards**, the **UPHOLSTERY** is **SEAMLESS** and made of high-quality imitation leather. The **ABS plastic COVER** that protects the table base is **screwless** and thus **completely smooth**.

The head and leg section **ADJUSTMENT LEVERS** with a mechanism **integrated** in the frame are **easier to press** and **clean**.
